OBJECTIVE

I am an enthusiastic Front-end developer with a strong focus on design and a passion for crafting outstanding user-centric and responsive web interfaces. My goal is to continuously enhance my skills whilst staying up-to-date with new trends, emerging technologies and positively contribute to a collaborative work environment.

EXPERIENCE

Freelance Software Engineer (Frontend Web Developer Role)   **February 2024 – Till Date**
  Key Responsibilities & Accomplishments:
- Designed and developed responsive, high-performance web interfaces for various clients.
- Utilizing modern frontend technologies such as React.js, Next.js and a high proficiency utilizing Vanilla.js as base Fundamentals across multiple projects.
- SEO Success – Enhanced organic growth traffic by 50% through strategic Keyword research, Meta tags and a well-designed Metadata structure to help enhance visibility.
- Collaborated with startups and small businesses to create user-friendly interfaces, improve UI/UX, and optimize overall website performance.
- Built reusable components and design systems to enhance development efficiency and overall code maintainability.
- Conducted code reviews, performance audits, and implemented best practices for SEO, accessibility, and cross-browser compatibility.
- Provided Web Hosting Solutions on request and Deployed applications using cloud platforms such as Vercel, Namecheap, Hostinger and Others.

  Notable Freelance Projects:
1. **Appliance Repair Service Website** – Designed and developed an appliance repair service website for a company in Canada.
   Development Link: *(https://appliancesrepairnearme.ca)*

2. **Teesgarage** – Built an auto Repair service website for Teesgarage. An Auto repair service company based here in Lagos state Nigeria.
   Development Link: *(https://teesgarage.vercel.app)*

3. **Edubridge Academy** – Designed and developed an interactive career advisory programs platform for Edubridge Academy. **Link:** *(https://edubridgeacademy.vercel.app)*

Software Engineering (Frontend Web Developer Role)   04th Oct 2023 – 04th Jan: 2024
Steveraton Group Incorporated (SGI)

- Tasked with Collaborating with the development team to create innovative, robust, and easy to-use web applications. This team consisted of a Product Design team, Product Management team and a Software Development team.
- Converting wireframes and design mockups into completely integrated web-interfaces producing well optimized visual elements for maximum speed and scalability.
- Crafting impactful email templates that have driven over 25% increase in click-through rates. Integrated user-experience enhancements and code reviews that help slashed frontend bug reports and reduced load time as well as Media Queries solutions.

Junior Frontend Web Developer Role   May - July: 2023
Wild Fusion Digital Center (WDC.ng)

- Responsible for conducting research, developing intermediate websites which met required functionalities, performing user testing and designing responsive user interfaces.
- Utilizing the necessary skills when required and also giving insight and suggestions regarding various development topics as well as how to approach challenges to attain the required solutions
- Additionally, I was involved in the brainstorming of ideas and development for small scale service offering businesses, portfolio designs and descriptive research to better help enhance their brand identity and boost outreach.

UI/UX Designer (Freelance)   November 2022 – till date
Freelancing

- Responsible for designing and developing template samples for multiple web interfaces, prototyping, mockup designs while prioritizing the user-interface to best optimize and enhance the overall user's experience.
- Assisted a few businesses with detailed mockups which were implemented into responsive web interfaces for product and service scalability, professional portfolio inquisitors and conducted advanced UI research, creating personalized UI templates and ensuring seamless user flow for their websites.

SKILLS

- **Web Development:** Proficiency in utilizing modern Frontend frameworks ("React.js and Next.js"), UI component libraries ("Tailwind and Bootstrap") and a strong foundation in JavaScript Fundamentals and Advanced Programing Concepts.
- **Product Design (UI/UX):** Proficient in using Product Design tools like Figma and Adobe XD to develop user-centric products, mockups and well prototyped wireframes.

- **Problem-solving and Analytical Skills:** Capable of conducting detailed research, performing value calculations to address challenges effectively, deadline oriented and sensitive focus to project completion.
- **Communication and Interpersonal Skills:** Good communicative abilities, enabling successful presentations of various projects and in-depth evaluation on content details.
