Certified

Experience

Software Engineering (Frontend Developer Intern: duration 3months)   **Oct-Dec: 2023**
Steveraton Group Incorporated (SGI)

- Tasked with Collaborating with the development team to create innovative, robust, and easy to-use web applications. This team consisted of a Product Design team, Product Management team and a Software Development team.

- Translate UI/UX design wireframes into actual code to produce visual elements of the application which were well Optimize web applications for maximum speed and scalability. This was an added advantage as I was a Product Designer myself so a complete understanding of the design schematics, wireframes and Design mockups was already a scope of work which I was completely in sync with.

- Assure that all user input and review with the content management Teams are validated before submitting any project to the back-end team.

- Maintain and improving website performances whilst staying up-to-date with emerging technologies and laying strong emphasized on proper documentation on all inventory-related records, regardless of their size or urgency, to maintain a comprehensive documentation.

Junior Frontend Developer Role   **May-July: 2023**
Wild Fusion Digital Center
- Responsible for conducting research, developing basic and intermediate websites with functionalities, performing user testing and designing responsive user interfaces.
- Utilizing the necessary skills when required and also giving insight and suggestions regarding various topics as well as how to approach the challenge to attain the required solutions
- Additionally, I was involved in the brainstorming of ideas and development approaches for representational websites for small scaled businesses, individual portfolios and descriptive detailed research better helping enhancing their online presence and boosting their outreach.

UI/UX Designer (Freelance)   **November 2022 – till date**
Freelancing
- Responsible for designing and developing template samples for multiple web interfaces, prototyping, mockup deigns while prioritizing the user-interface to best optimize and enhance the user experience.
- Assisted a few businesses with detailed mockups which can be implemented into responsive web interfaces for product and service scalability, product detail-oriented enthusiast, professional portfolio inquisitors and an educational institute in creating personalized UI templates and ensuring seamless user flow for their websites.

Skills

- **Responsive Web Design:** Proficient in HTML, CSS and its allied frameworks (Bootstrap and Tailwind.css), JavaScript, jQuery and React.js. A proper understanding and utilization of these as well as their utilization and integration into fully responsive deployed websites.

- **Product Design (UI/UX):** Proficient in using Product Design tools like Figma and Adobe XD to develop user-centric products, mockups and well prototyped wireframes.
- **Problem-solving and Analytical Skills:** Capable of conducting detailed research, recordkeeping and performing value calculations to address challenges effectively, deadline oriented and sensitive focus to project completion.
- **Communication and Interpersonal Skills:** Good communicative abilities, enabling successful presentations of various projects and in-depth evaluation on content details.

Key Achievements

- With the application of all of the Above and a lot more I was able to complete the web design and development of 4 fully responsive websites for Steveraton Group Incorporated within the Duration stated above. The projects built for Steveraton Group Incorporated resides actively on each domain for all three subsidiary industry and mother company **SGI**

- With my knowledge and skillset across both fields (Web Development and Product Design respectively) I have been favored to have completed a handful of outstanding projects from small business, brands and companies. Being able to deliver web services with a clear understanding of the design concepts and development processes as well as all necessary steps required at any stage of a project's gives an outlined advantage which set me apart in the software Industry.
